To whom it may concern:

This is an unsolicited testimonial letter regarding the performance of Mr. Lucien Vaughn and Tar Heel Builders.

Mr. Vaughn and Tar Heel Builders just completed an expansion of the office building of New Bern Surgical Associates. We would not be more pleased. The expansion was completed on time and budget. This was a tricky expansion as work had to be carried out while the surgical practice continued to see patients on the premises.

During the remodeling of the inside of the building the workers were as quiet as possible and maintained a clean environment. This was despite their having to tear out dry walls and plumbing. They worked around our schedule when possible.

The exterior building blends with the original design and materials such that only close inspection reveals the addition. The original building was built by Marshall-Erdman Associates and they have expressed their praise about the quality of the expansion.

Every detail of the project, including the parking lots and land-scaping has been perfect.

Obviously I am very pleased with this company and have no reservations recommending them.

Sincerely,

O. Drew Grice, M.D.
President, New Bern Surgical Associates
